8.30am - 5.00pm

**24 Hour
Emergency Service**

Phone: 9928 1043

Mingenew became part of a Multi Purpose Service (MPS) in August 2000. This community driven decision has enabled pooling of Commonwealth and State health and aged care funds within the areas of Dongara, Eneabba and Mingenew, and apply these funds flexibly across all health and aged care programs.

The MPS enables communities to have:

- The ability to operate all health and aged care services under one organisation, with improved co-ordination and opportunities for greater flexibility and better targeting of services to meet community needs.
- The ability to be innovative in service delivery.
- The opportunity for small communities to access Commonwealth funds to meet aged care needs.
- The opportunity to attract and retain staff by offering them flexible and multi-faceted roles.

The Dongara, Eneabba, Mingenew MPS provides services aimed to prevent illness, reduce the impact of disease or trauma, and to promote healthy lifestyles for individuals and families.

Silver Chain Nursing Association manages the Mingenew Silver Chain Centre.

Acute and Emergency Care

Mingenew Silver Chain Centre provides a 24-hour Accident and Emergency service.

Available: 24hrs a day

Contact: 9928 1043

Patient Assisted Travel Scheme (PATS)

PATS is available to assist people living in the country, who are required to travel more than 100kms (one way) to obtain the nearest available specialist or obstetric treatment that is not available locally or from a visiting service.

People who live between 70 and 100kms from the treatment centre and who require regular oncology or dialysis treatment which is not available locally, can also access PATS.

Community Care

Community Care support incorporates practical and flexible services to assist members of the community, particularly frail older people, people with disabilities and their carers to maintain independence and a quality of life within their home. Services include:

Community Care Nursing: home based visiting service, which provides a wide range of nursing and palliative care, education and ongoing support, monitoring and assistance for chronic and unstable conditions.

Community Care Services:

- **Home Help:** assistance with tasks such as cleaning and food preparation along with assistance in attending appointments etc.
- **Home Maintenance and Gardening:** routine maintenance and repairs services such as installation of safety aids, minor modifications inside and outside the home and repairs to locks, doors and windows. Gardening can also be provided to ensure a safe environment.
- **Meals on Wheels:** provide a five-day, home delivered hot/cold meal and sweet at lunch time to eligible clients unable to maintain adequate nutritional intake.

Centre-Based Day Centre: This service offers a varied range of activities that are meaningful, relevant, and age appropriate. It provides the opportunity for clients to socialise with persons of a similar age and circumstance, in a friendly and comfortable environment.

Respite Care: Carer Respite Centres are committed to supporting carers and those for whom they care for in the community. The centres assist in coordinating flexible and innovative respite for carers, which allows carers to take a break from their caring role.

Population Health

The staff of Population Health can assist you to make healthy choices and prevent illnesses. Community Nurses, Health Promotion professionals and Allied Health practitioners are all part of the Population Health team and can provide information about a range of health issues.

Community Health: This service aims to provide a broad range of programs and services for the general community, including chronic disease management, child & maternal health services, immunisation, parenting support & education, school health screening & education, and women's, mens' and youth health education & support.

Child Health Clinic: Wednesdays, by appointment

Contact: 9927 0200

Health Promotion: Staff work in the promotion of good health and the prevention of diseases. They work with many different groups and communities to assist people in making healthy choices in order to increase control over or improve their health. Our Community Health Nurses play a large role in the promotion of health.

For information about healthy lifestyles, including nutrition, physical activity, smoking, injury prevention, sexual health and chronic disease, please contact:

Population Health

Allied Health: Support is available from on-site and visiting professionals. General multidisciplinary services may be provided on a one to one basis or within a number of different programs. Allied Health services include:

Asthma Education: An Asthma Educator is available for education including the use of inhaled medications, Asthma first aid, and assistance with home oxygen for those people managing Asthma and other respiratory illnesses.

Audiology: The Audiologist provides professional assessment and treatment of those with hearing difficulties, including full audiological assessments, consultation with Ear Nose and Throat Specialists, regular liaison with Speech Pathologists, Community and School Nurses, and referral to the Office of Australian Hearing Services.

Continence Advice: The Continence Resource Nurse provides assessment, support, education, and management for those in the community with bowel and bladder problems.

Diabetes Education: A Diabetic Educator is available to provide advice and support for those pre-disposed or having existing diabetes. Assistance can be offered with diabetes management and/or dietary advice for the management of weight loss, cholesterol, glucose intolerance and general healthy lifestyle skills.

Dietetics: The staff of the Nutrition and Dietetic Department are available to provide assessment and treatment for a range of dietary conditions. The Dietitian will provide education and support for those requiring treatment for cardiac rehabilitation, diabetes, stroke rehabilitation, and eating disorders.

Occupational Therapy: Therapists work with children and adults to overcome limitations caused by injury or illness, psychological or emotional difficulties, developmental delay or the effects of aging. Support can include direct therapy intervention referral to different agencies, environmental assessments and provision of supportive equipment.

Podiatry: Podiatry is a specialised field dealing with foot health and care. This service is especially beneficial to those with Diabetes, age related complications, and children.

Physiotherapy: Physiotherapists provide assessment and treatment for a variety of complaints, disorders or delays, providing group education for injury prevention, health promotion, growth and development, school education – back care, school bag weights, sports injury. Consultations are available for any age group.

Social Work: Social Workers are available to assist you and your family; they can offer counselling, referral to services, help with assessing resources and liaison with other agencies on your behalf.

Speech Pathology: Speech Pathologists are available to provide assessment and treatment of swallowing or communication difficulties.

A number of these services are offered on a visiting basis, while others are accessible through the Dongara Health Service.
